

# CONSTRUCTION TRADE APPRENTICESHIP PROGRAMS

---

Apprenticeship is the “earn while you learn career” that will lead to a good living wage with health and retirement benefits. An apprentice is an employee who learns a skilled trade in a planned, supervised job environment—about 80% on-the job and about 20% classroom training. An apprentice is a regular part of the workforce team and earns wages while being trained and acquiring skills. **The best part of apprenticeship is that your training is free!**

The length of apprenticeships varies among the construction trades – usually 3-5 years. Upon graduation from apprenticeship, you can begin your career as a journeyman and work anywhere in the United States. **Construction jobs will not be shipped overseas.**
